

Press Release

October 4th, 2017

Gatling Corp: "Innovative Company" label

Gatling Corp has been given the "Innovative Company" label by **Systematic Paris-Region**. **Systematic Paris-Region** gathers SMEs, large groups, universities and public institutions to promote digital innovation in Paris area.

Gatling Corp wants to raise three million euros at the beginning of 2018.

Gatling Corp develops the open-source tool Gatling

Gatling Corp develops an open-source load and performance testing tool for applications, called "**Gatling**".

Started in 2011 by Stéphane Landelle, this open-source project experienced a rapid growth around the globe, especially in the DevOps world.

Gatling was mentioned twice, in 2013 and 2014, in **ThoughtWorks** Technology Radar.

Gatling Corp was awarded "Company worth following in 2017-2018" in the French magazine **Management**.

Gatling will reach 1 million downloads by the end of 2017

With nearly 1 million downloads in more than 100 countries, **Gatling** benefits from the strong support of its community that raises awareness about the importance of performance testing within organizations and companies.

Performance testing is key to business strategy

All the companies, big or small, no matter what their businesses are, are facing performance issues: media exposure, rapid growth or even the Black Friday can make their applications crash, because of too much traffic.

Gatling is made to avoid these crashes.

Gatling's new challenges with Gatling FrontLine

The company **Gatling Corp** was created in July 2015, in order to provide **Gatling's** community with professional services and an Enterprise Version, called "**Gatling FrontLine**".

The fundraising, planned for the beginning of 2018, aims at promoting **Gatling FrontLine** around the world, especially with the creation of a subsidiary in the United States.
